CAN NAPPING HELP YOU LEARN?

Participate in a research study to see whether napping can help you learn and earn $10/hour.

Participants must be right-handed, between 18-65 years old, with no history of neurologic, psychiatric or sleep disorder and no use of psychotropic medications or drugs in the past 6 months, must not be pregnant or planning to become pregnant, have a normal sleep duration of 6-10 hours per night, and the ability to participate over a 3 week period.

Contact Tracy at 747-0590 or tracyn@npg.wustl.edu for further information and an initial screening.
